

## **CA ERwin® Model Navigator**

### **Former Name: AllFusion® Model Navigator**

Employ cost-effective, read-only access to models built with CA ERwin® Data Modeler and CA ERwin® Process Modeler. CA ERwin® Model Navigator gives non-modelers access to model information for presentation, analysis and application development functions.

### **Overview**

#### **What is CA ERwin® Model Navigator?**

It is a complementary product to both CA ERwin Data Modeler and CA ERwin Process Modeler that provides non-modelers access to model information for presentation, analysis and application development functions. By letting users readily share corporate data models, new applications can be created more quickly, with a comprehensive, visual blueprint.

#### **What modeling challenges does it meet?**

It enables the sharing of model information amongst interested business users who are not directly involved in the database design or business process modeling. It also allows them to access and run the full range of CA ERwin Data Modeler and CA ERwin Process Modeler reports necessary for detailed analysis.

#### **What features does it offer?**

With its read-only access, CA ERwin Model Navigator supports the standard ERwin® Data Modeler and ERwin® Process Modeler navigation, display, reporting and printing features.

#### **What platforms does it support?**

MS Windows
