

# The Most Connected Data Management and Governance Solutions

erwin<sup>®</sup>  
the data governance company

Sandhill

The **erwin EDGE** creates an “**enterprise data governance experience**” that fuels data-driven insights, innovation, compliance and business transformation. It’s the only unified software platform that addresses data preparation, modeling and governance through the broadest set of connectors and automated code generation, data mapping and cataloging tools. Working together, these solutions help technical users realize greater efficiencies and business users receive better analytics. **Data dilemmas solved.**

## erwin Data Governance

The most connected, role-based data governance solution that enables both IT and business stakeholders to discover, understand, govern and socialize data assets. It’s the only software integrating traditional data governance with data modeling and preparation capabilities for faster time to value and change management with lower risks and costs.

## erwin DM NoSQL

The only enterprise-class data modeling solution with native support for Couchbase and MongoDB. Use SaaS-based erwin DM NoSQL to deploy new Couchbase and MongoDB applications and migrate infrastructure to the cloud quickly, while maintaining the underlying data’s integrity, quality and governance.

## erwin Enterprise Architecture

A complete suite of model-driven, repository-based, user friendly and collaborative enterprise architecture tools to plan, govern and manage change with greater flexibility and cost-effectiveness. erwin EA is an on-premise solution that can be highly customized for integration into the customer environment.

## erwin Business Process

Business process modeling software for visualizing system interactions, business processes and organizational hierarchies to ensure alignment with business objectives. With these insights from erwin BP, better operational decisions can be made based on a central source of facts.

## erwin Data Modeler

The industry-leading data modeling solution with visual design and documentation capabilities for any data from anywhere across an organization. With a unified view of strategic data assets through erwin DM, mission-critical information will be used, understood and trusted across the enterprise.

## erwin Mapping Manager

An automated enterprise data mapping and code generation solution that provides data visibility, lineage and governance throughout the data integration lifecycle. Map data elements to their sources within a single repository to determine data lineage, deploy data warehouses and other Big Data solutions, and harmonize data integration across platforms.

## erwin Enterprise Architecture Agile

A full-featured, cloud-based set of enterprise architecture tools for translating an organization’s strategic goals into a blueprint of IT capabilities. erwin EA Agile can be deployed quickly and uses industry platforms, such as TOGAF<sup>®</sup> and ArchiMate<sup>®</sup> 3.0, out of the box.

## erwin CloudCore

Cloud-based hosting services for erwin data modeling and enterprise architecture solutions. Pay-as-you-go versions of erwin DM, EA and BP also are available via erwin CloudCore, plus bring-your-own-license support for existing customers.
