

erwin[®] Data Literacy (DL)

AT A GLANCE

erwin DL enables data stakeholders to view data relevant to their roles and understand it within a business context. With this they can produce accurate, actionable insights and collaborate across the enterprise, to enact them for the desired outcomes – from regulatory compliance to revenue growth. Comprised of the erwin Business Glossary Manager and the erwin Business User Portal, the erwin DL software suite ensures your company is fluent in the language of data. When combined with erwin Data Catalog (DC), stakeholders have an integrated and contextual view of the semantic, business and technical aspects of the entire data landscape.

KEY BENEFITS/RESULTS

- Provides visibility, collaboration and governance for any data, anywhere (Any²)
- Identifies data connectivity, implications and impacts across the enterprise to better manage change
- Creates an ecosystem of people, processes and technologies to manage and protect data
- Breaks down business and IT silos for full visibility. Breaks down silos between disconnected systems, spreadsheets, reporting and intelligence, to enhance stakeholder understanding and trust
- Helps mitigate a wide range of risks to provide regulatory peace of mind

KEY FEATURES

- Build and publish business glossaries of terms in taxonomies, with synonyms, acronyms and relationships, to describe the organisation's data assets
- Assign data stewards to manage the definition and approval process, and assign data owners to approve
- Author, maintain and publish information policies, combined with roles and responsibilities

| # | Business Term | Definition | Classification | Status | Data Steward | Catalog |
|---|-------------------------------------|--|----------------|-----------|--------------|---------|
